Art Unit: 2834

The following action replaces the paper mailed 5-3-03 and restarts the response period as per the telephone conversation with applicants attorney, Mr. Scafetta, on 5-21-03. The examiner apologizes for the inaccuracies in the former action.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to a piezoelectric vibrator, classified in class 310, subclass 323.02.
- II. Claims 10-19, drawn to a method of manufacturing a piezoelectric device, classified in class 29, subclass 25.35.

The inventions are distinct, each from the other because:

Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the piezoelectric vibrator of Group I can be made by methods other than those of Group II, e.g. Each resonator could be individually constructed thus eliminating the "dividing" step.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
